(54) Title: BRAKING ASSEMBLY

WO 2004/031017 A1

(57) **Abstract:** There is described a vehicle braking assembly for a wheel which comprises a braking member arranged to move relative to the main body of the wheel between an inoperative and an operative position, blocking means adapted to prevent the braking member from moving to an operative position characterised in that the trigger means is operable by coded message passed by a separate transmitter as electromagnetic radiation and the assembly is provided with an LMR sensor.
